

Rene Albert Leon, M.D.

Dr. Leon has been in practice over 24 years with Texas Regional Asthma and Allergy Center, in Southlake, Texas. Growing up as the son of a physician in South Florida and having been exposed to medicine as a child, sparked an interest in the medical field. Dr. Leon has been married for 29 years and has two wonderful children. His passion is his family, but he also enjoys traveling and exercising during his free time. He taught at the University of Texas Southwestern Medical School in Dallas, and served as a Clinical Associate Professor with the Division of Allergy and Immunology. This position provided Dr. Leon the opportunity to spend time at the Allergy and Immunology Clinic at UT Southwestern Parkland Memorial Hospital, allowing him to interact with students and faculty as well as interesting patients not commonly seen in the private practice setting. He still enjoys providing students, residents and Allergy and Immunology Fellows, the opportunity to rotate into the office, which allows them to experience the private practice setting. "As an allergist, my number one goal is to take the best possible care of my patients and to provide them an improved quality of life. As a practice owner, my goal is to make sure your experience at Texas Regional Allergy and Asthma Center is absolutely the most professional and enjoyable medical experience that can be provided."
